

Comenius Project

Class-3rd D Arraiolos

On the last 5th October we celebrated the centenary of the Portuguese Republic. We went to the Library, we looked at some documents, we saw a power point and we observed some books of that period of time.

There, we have decided which was the painter that we wanted to work about and we have chosen Bordalo Pinheiro, because he was a *Great* artist of that period.

In our classroom we have made some lookups about his biography, and we have produced a power point starting by “*Me Columbano*”, in which he was telling his personal and artistic life .

One part of the power point was presented in France, but it was necessary to make some adaptations in order to make it true according to the biography of the author.

"Me Columbano..."

After that, we have selected the paintings that we are going to work about.

"Invitation to dance"

" Camões and the Nymphes"

" My mother"

"Going down the Chiado"

"Tea Time"

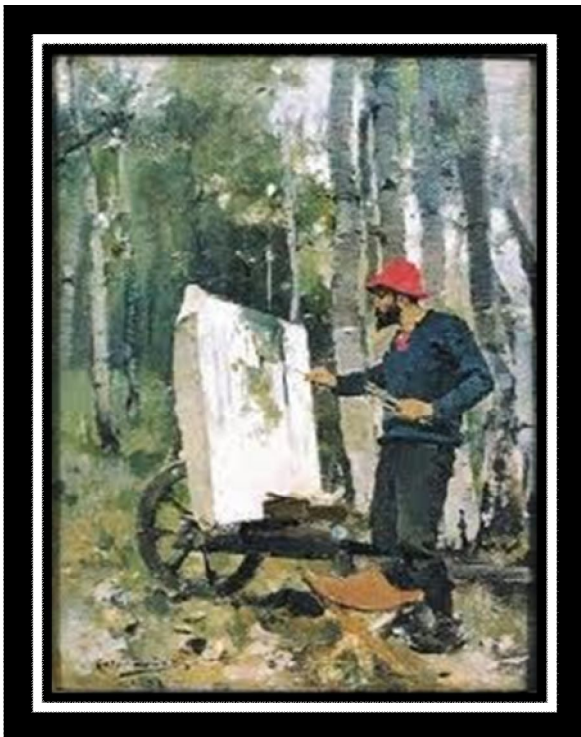

"Lady Inês' death"

" The Republic"

“ Walking on the park”

“Painting in the wood”

In my studio"

We pressed the pictures of the selected painting, from the internet.

We have cut out, we glued in colored pasteboards and we made a frame by using the laces of the paper that we use under the special plates for cakes.

It was a very peasant work, because we have learned a lot and we where also able to create Art by using recycled materials.
