

COLUMBANO BORDALO PINHEIRO AND AMADEO DE SOUZA CARDOSO

This year we commemorate the **centenary of the Republic in Portugal**. In our school we talked about this subject, we watched some books, objects and paintings of this period.

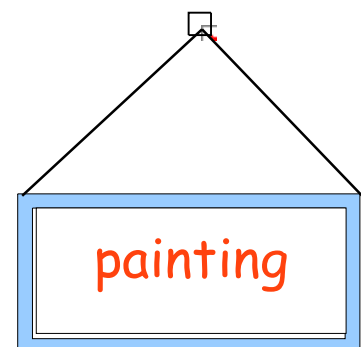

Here we are looking
at a power point
containing paintings
of this period.

We made some researches on the internet about the portuguese painters.

We looked carefully at some paintings in books.

We liked this painting very much. It's name is "Going down the Chiado" and we decided to create a story for it.

And it was the wonderful story that we produced altogether.

Descendo o Chiado

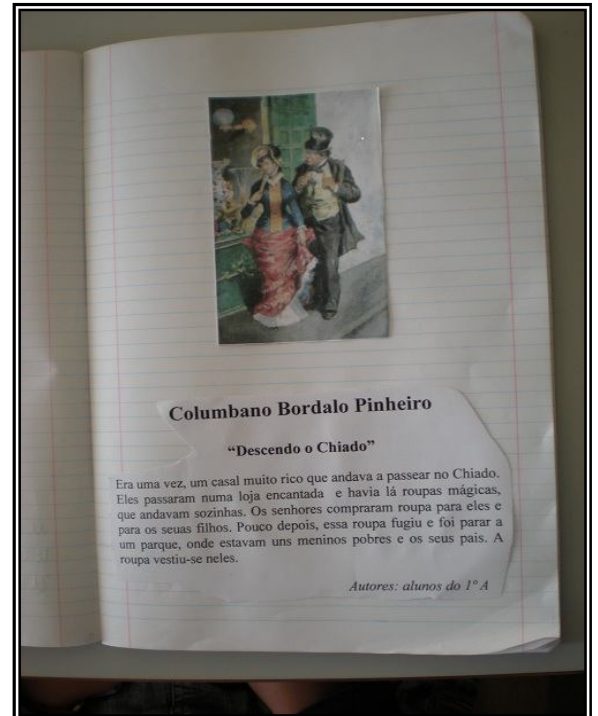

Going down the Chiado

Once upon a time there was a very rich couple who was walking on the Chiado. They passed by an enchanted shop and there were magic clothes, which could walk by themselves. They bought some clothes for them and for their children. After a while the clothes ran away and went to a park, and there were some poor children. The clothes put on those children.

We cut out the picture and the story with we had written by using the computer. After, we glued it in our exercise book.

The clothes of that period caught our attention, so that, we decided to make a research about it.

Later on, we drew and we painted the magic clothes of our story and also the **magic shop**. To do this we used water - colours.
